EXPERIENCE

National Australia Bank   Dec 2016-

Senior Analyst, Developer

Provide technical advice to a customer-facing application development team with an aim to reduce waste and technical debt and to improve cycle time and best practices. Work closely with product owners and business analysts in order to identify minimum viability and deliver products to market faster.

- Responsible for improving the continuous delivery pipeline via Jenkins
- Key role in migrating platform components from Angular 1 to React and Redux
- Strong focus on increasing levels of documentation, test coverage and code quality

Luxbet (Tabcorp)   Dec 2014-Dec 2016

Senior UI Developer

Actively develop internal application which visualizes and manipulates large volume of betting data. This application's UI interacts with data and persistence servers via XHR (AJAX) and WebSockets. The whole application is written in Ember.js (using Ember CLI).

- Used JIRA to track development (following Agile and Scrum practices)
- Travelled interstate to oversee deployments and perform usability testing
- Interviewed and trained several new developers in both tech and business areas

Easyweb Digital   Oct 2013-Oct 2014

Web Application & Systems Developer

Brought on to maintain PHP servers and develop JavaScript (jQuery and Bootstrap) front-end for a new Wi-Fi management system. Front-end is responsive and only communicates with server for data updates via AJAX for much faster development and user experience.

- Built fast application front-end for enterprise system
- Built and maintained custom reporting interfaces for clients
- Implemented best practices in the development team

ObjectMastery Feb 2012-Oct 2013

Software Developer

Involved maintaining legacy systems (some up to 20 years old) for clients in the financial sector and developing applications according to client specifications in Delphi, HTML and JavaScript. Collaborated with COO to design mobile interface in Photoshop with CSS.

- Active development on systems built in Delphi and Cold Fusion
- Delivered projects for several clients (managed in Jira)
- Responsible for regular database interaction and administration

Oxfam Australia Jan 2010-Jun 2010

Database Intern

As part of Monash University's industry-based learning program, placed in technical team which developed applications in Visual Basic and Microsoft Access for internal use. Designed queries and procedures in SQL Server for facilitating financial transactions.

- Conducted a six-month placement within Oxfam's database team
- Performed regular maintenance on database systems (Microsoft SQL Server)
- Developed software for use by the database team (Microsoft VBA, Microsoft Access)
- Participated in unit testing for production websites

EDUCATION

Monash University 2009-2012

Bachelor of Information *Technology Systems degree*

- Games Development major
- Distinction-level average grades
- Invited to be a member of the Golden Key society

SKILLS

JavaScript

> Angular AVA Babel Backbone Bootstrap Browserify Cucumber Ember
> Express Google Analytics Grunt Gulp Immutable jQuery Mocha Node.js
> React Redux Rollup RxJs Socket.IO TypeScript Underscore Webpack

Databases

> Firebird Microsoft SQL Server MongoDB MySQL Oracle Database Postgres
> Sqlite
